Competitors

Groww
1.34 Cr active clients · 29.2% market share
~40% of direct-plan SIP inflows (DRHP, 2025)

Zerodha Coin
67.9 L active clients · 14.7% market share
Direct plans, no fees, inside Zerodha's app

INDmoney
7.19 L active clients
Super app: outside funds, US stocks, family view

Detailed Competitve Analysis

Active clients = NSE broking clients, Sep 2026
Sources: CXO Pulse Biz Standard Jainam

Our take

All three sell the same zero-commission direct plans, so **starting a SIP is easy to copy. Keeping it going is where INDmoney can stand apart.**

Strategic goal

Raise the % of first-time MF investors with an active SIP 12 months after their first
Active = 1+ successful instalment in last 30 days
Rules: no fund picks; no fear, FOMO or urgency nudges

Metric breakdown

12M Active Rate = $P_1 \times P_2 \times P_3 \times P_4 + P_5$

P_1 First instalment success rate
Setup friction, first red day: 18.4% of signals

P_2 Autopay holds in months 2–3
Mandate and debit failures: 6.3% of signals

P_3 SIP survives months 3–6
The cliff window: 54.2% of drop-off signals

P_4 SIP survives months 6–12
Corrections, no guidance: 21.6% of signals

P_5 Lapsed SIP is revived
Resumed after a pause or failed debit: not sized yet

KPI Tree

8,179 Posts Became 3,079 Signals: SIPs Break in Months 3–6

An AI engine turned 8,179 public posts into 3,079 clean signals across 10 themes, showing why first-time investors let SIPs lapse

1 Collect
Scraped 8,179 public posts from 5 sources: Play Store, App Store, YouTube, TradingQ&A and ValuePickr

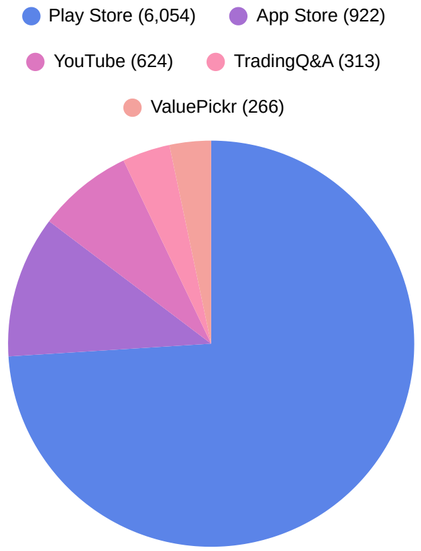

2 Clean
Removed duplicates and off-topic posts and masked personal data. 3,079 clean signals kept

3 Extract
An LLM tags each signal on 7 dimensions, including emotion and which of 9 discovery questions it answers

4 Score
Signals form 10 themes, ranked by Opportunity Score: frequency 30%, severity 30%, actionability 25%, recency 15%

5 Serve and check
A Copilot answers with verbatim quotes. A 20-item hand-labeled golden set tests the engine

Where the signals come from

Raw posts by source, n = 8,179

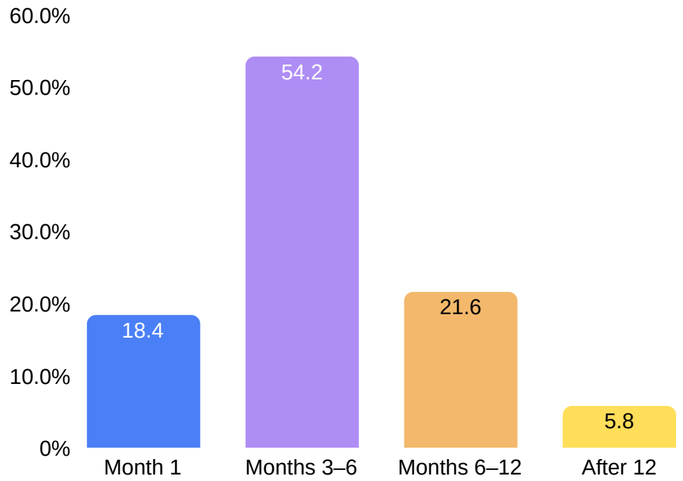

Details: How it works

What the engine found: top 5 of 10 themes

Theme	Signals	What breaks
Information Desert	**829 (26.9%)** score 0.834	Raw XIRR and NAV shown with no plain-language meaning
Red Portfolio Panic	**816 (26.5%)** score 0.822	Small early dips (−2% to −5%) lead to paused SIPs
Cross-Selling Fatigue	**355 (11.5%)** score 0.664	Loan, card and US-stock banners crowd the MF screen
Peer Influence	**365 (11.9%)** score 0.628	Sign-ups driven by reels and friends, not goals
Mandate & Payment Friction	**195 (6.3%)** score 0.607	Auto-debit failures and unit-allocation lag erode trust
